I. INTRODUCTION

The following report is a guide to the reference material available at the Mapping and Charting Research Laboratory dealing with the subject of Soviet Cartography. Persons using this report should note that the data are arranged according to subjects as outlined in the Table of Contents. Another point of interest to cartographers is the fact that this bibliography is by no means to be considered as complete coverage of the field. In the first place, Soviet data are too numerous and cover such a long period of endeavor that complete referencing is both unnecessary and undesirable. Much of the information available for periods prior to 1935 are of little value at the present time except in the historical sense or to be used as one method to measure the Soviet rate of progress in this field. Secondly, data which pertain to the thousands of references available for various types of maps of specific areas, both large and small, have been omitted. Exceptions to this rule include large bibliographies covering unit areas, atlases of specific regions and occasional references to the Soviet map "series" of several types. Several entries, such as references to Soviet nomenclature, are included only as samples of the type of information which is available.

Although the materials referred to in this report were collected from many libraries both in this country and abroad, considerable effort has been expended to determine whether or not that material is now available at the Library of Congress. Therefore, the library call numbers given for each reference at this Library is recorded here. For libraries other than the Library of Congress, the letter code used in the Union List of Serials to denote other U.S. libraries is noted.

Declassified and Approved For Release 2012/12/13 : CIA-RDP79-00201A000100030001-4

Declassified and Approved For Release 2012/12/13 : CIA-RDP79-00201A000100030001-4

The reference, OSU-MCNL, means either that efforts to locate other copies of the item so referenced have failed or that it is or has been classified. Persons wishing to obtain these items are asked to contact the sponsoring agency for permission to use this material.

During the course of search for Soviet cartographic data numerous references to the cartographic literature of the satellite and bordering nations -- books, manuals, periodicals and serials -- were collected. These items, although of considerable significance, have been omitted from this report because of definite time and personnel limitations.

Q. GENERAL CARTOGRAPHY

References included in this section are both numerous and varied in subject. Since time does not permit a complete subject subdivision of this grouping, a partial break-down into eight subject-headings has been made for the convenience of the user. Numerical items listed under each subdivision refer to the number of the reference listed in the bibliography which follows.

1. Authorship on Maps

Items: 1, 71, 80

2. Transcription - Toponymy

Items: 2, 28, 34, 145, 169, 178

3. Cartographic Editing

Items: 13, 52, 77, 86, 117, 136, 138, 144, 156

4. Education - Educational Cartography

Items: 14, 15, 37, 43, 69, 70, 91, 102, 103, 108, 110, 115, 180, 181, 182

5. Map Factories

Items: 15, 38, 107, 112, 121, 126, 130, 134, 152, 167, 175, 187

6. Aerial Surveying and Aviation Cartography

Items: 18, 31, 61, 77, 78, 93, 118, 119, 120, 131, 148, 159

7. History and Organization of Soviet Cartography

Items: 19, 20, 22, 24, 32, 33, 37, 42, 52, 56, 57, 63, 64, 67, 82, 83, 96, 98, 99, 101, 103, 104, 105, 106, 113, 148, 149, 150, 151, 165, 166, 167, 171, 179

8. Cartographic Nomenclature

Items: 21, 29, 116
